

# NEWS RELEASE

March 28, 2024  
Refinverse Group, Inc.

## Introduction of Refiniverse Group's efforts to solve local issues

Refiniverse Group, Inc. (Head office: Chiyoda-ku, Tokyo, President: Akira Ochi) manufactures and sells REAMIDE<sup>®</sup>, a nylon resin made from recycled fishing net waste, which is said to be one of the causes of marine pollution problems. We have collaborated with various companies actively working to solve environmental problems.

On March 10, a business collaboration agreement signing ceremony between Choshi Electric Railway and Hisatsu Orange Railway was held at Kawauchi Station in Kagoshima Prefecture.

At the ceremony, Morikou Fishingnet Co.Ltd. collected disposed fishing nets, Refiniverse, Inc. recycled them into raw materials, and Morito Apparel Co., Ltd. produced T-shirts and coaster-shaped commemorative plates (designed by Mr. Sakazono, a designer from the Regional Revitalization Cooperation Team of Choshi City, Chiba Prefecture), and ticket holders with neck straps made from reused fishing nets.

We will continue to collaborate with a wide variety of companies and organizations and participate in initiatives that contribute to the realization of a sustainable society.

T-shirts and commemorative coasters featuring REAMIDE® were displayed at the business collaboration agreement signing ceremony.
